Doing Business with RTTC

Privacy and Security

The Redstone Technical Test Center is dedicated to ensuring the privacy, confidentiality, and security of all customer hardware, software, ideas, documents, etc. brought to RTTC or created, modified, or enhanced here. This is accomplished in three major ways.

- Because RTTC is an advanced testing organization with "restricted access" facilities, only those persons with "a need-to-know," proper security clearances, an escort, etc. have access to specific areas.
- All RTTC personnel have security clearances and have been trained in not just general security areas, but also in the proper "security" protection of customer hardware, software, ideas, documents, etc.
- RTTC understands that all customer hardware, software, ideas, documents, etc. brought to RTTC or created, modified, or enhanced here, is the sole property of the customer. Therefore we do not release these materials to anyone but those authorized by the customer.
